
ESP32-S3-WROOM-1U-N4 + GPIO Multiplexer + Screwterminals + Programming + Connector
MS561101BA03-1 + Address-change
KX134 + Address-change
ADXL375 + Address-change
Needs 10k Pull-Ups
Changes last bit of I2C address
PS to VDD for I2C
C12 is optional as bypass capacitor
Might be reasonable to add pull-down to bottom NMOS -> would make it highside switch (prob not good)
Spaceflight Rocketry Gießen e.V.
